SCHOOL OF SOCIAL SCIENCES AND LANGUAGES
CONTINUOUS ASSESSMENT TEST - I
FALL SEMESTER 2026-2027

SLOT: TCC2

Programme Name & Branch : M.Tech / MSc Common to All
Course Code and Course Name : MAENG501 Technical Report Writing
Faculty Name(s) : Dr. Senthil Babu M K, Dr Suraj Nandkumar Dhumal
Class Number(s) : VL2026270106248, VL2026270107873
Date of Examination : 10/08/2026
Exam Duration : 90 minutes

Maximum Marks: 50

General instruction(s):

- Answer All Questions
- M - Max mark; CO – Course Outcome; BL – Blooms Taxonomy Level (1 – Remember, 2 – Understand, 3 – Apply, 4 – Analyse, 5 – Evaluate, 6 – Create)
- Course Outcomes (Type the CO statements covered in this question paper. Use the CO number as per the syllabus copy)
 - a. CO1 Apply the principles of effective report writing.
 - b. CO3 Produce key components of technical documents, including sections focusing on
 - c. CO4 purpose, audience, and structure, through writing assignments.

Q. No	Question	M	CO	BL
1.	Define technical writing and explain its importance in professional contexts. Discuss the major features of effective technical writing with suitable examples.	10	CO4	BL 2
2.	Your department is organizing a Technical Writing Workshop for postgraduate students. Prepare a workshop announcement message by appropriately considering the purpose, audience, tone, and clarity of the communication. • Write a suitable heading/title for the announcement. • Clearly mention the purpose of the workshop. • Use language appropriate for postgraduate students. • Maintain a professional and suitable tone. • Present the information clearly, concisely, and logically. • Include relevant details such as the date, time, venue, target participants, and registration/participation details.	10	CO4	BL 3

3.	A) Read the following passage carefully and write a summary in about 50–60 words. Give a suitable title. Solar energy is one of the most promising sources of renewable energy. Solar panels convert sunlight into electricity without producing harmful emissions during operation. They can be installed on rooftops, open land, and other suitable locations. Although the initial installation cost can be high, solar systems reduce electricity expenses over time. Advances in solar technology are also improving efficiency and storage capacity, making solar power increasingly useful for homes, industries, and institutions.	05	CO4	BL 3
	B) Study the following technical passage carefully. Condense the main information into a well-organized summary of approximately 50–60 words and suggest a suitable title. Artificial intelligence is increasingly being used in healthcare to support doctors and improve patient care. AI systems can examine medical images, identify patterns in patient data, and assist in predicting certain diseases. These technologies can save time and improve diagnostic accuracy. However, healthcare professionals must carefully evaluate AI-generated results because errors can affect patient safety. Data privacy, ethical use, and human supervision are therefore essential when implementing AI in healthcare.	05

4.	Read the paragraph carefully. Identify the subject-verb agreement errors and write only the corrected verb forms in the appropriate order. Do not rewrite the entire paragraph. Artificial intelligence have become an important part of higher education. Each of the new applications require careful evaluation before implementation. A team of researchers are currently studying these technologies, while several experts has expressed concerns about their ethical use. Neither the teachers nor the administration are prepared to ignore these concerns. The quality of AI-generated content, together with its accuracy and reliability, depend on the data used to train the system. Everyone involved in the project have a responsibility to ensure responsible use of the technology. Either the project coordinator or the research assistants is expected to prepare the final report. Reading and analysing research articles help students develop critical-thinking skills. The findings of the study suggests that AI tools can support learning when they are used responsibly.	10	CO1	BL 3
5.	Read the following paragraph carefully. Identify the incorrect verb forms and write only the corrected verb forms in the appropriate order. Do not rewrite the entire paragraph. Researchers conduct a study on the impact of artificial intelligence in higher education for the past six months. They collect data from several universities and analyse the responses of more than five hundred students. Before the researchers began the study, several universities have already introduced AI-based learning tools. At present, the research team examined how students use these technologies in their academic work. The team will completed the final analysis by the end of next month. By the time the report is published, the researchers will work on the project for nearly a year. Last year, many students are using AI tools without proper guidance. Some students submit AI-generated assignments before	10	CO1	BL 3

the university introduced its academic-integrity guidelines. The researchers believe that responsible use of AI will improves the quality of learning. They also predict that universities will develop clearer policies on AI use in the coming years.
